Subject: D.A. Terry Report, August 29, 2003

RG Activities:

- Exploration monitoring and tracking
- Staffing office and dealing with permitting issues/enquires - also many calls regarding forest fire status in the area and work restrictions
- 1 day sample collecting for R to R project - most of planned project area is inaccessible due to the >10,000 ha Lamb Creek fire burning SW of Cranbrook
- **MLA Task Force tour of Kootenays:** Accompanied MLAs and Linda Stewart to meet with management and tour the Elkview and Fording River Coal Mines, Klondike Gold Fran project drill site. Meetings were held with the Association of Professional Engineers and Geoscientists of BC, the East Kootenay Chamber of Mines, the Chamber of Mines of Eastern BC (Nelson), and the Boundary Mining Association. All meetings were well attended and productive. 4-5 MLAs were present for most components of the tour.

Mineral Exploration Updates

- **Backcountry travel** in the entire region has been banned until at least September 14th - bringing to a halt any ongoing exploration activities
- **Fran:** Klondike Gold has started deepening their Fran hole which was started in 2002. The property is located to the northeast of Moyie Lake and is targeting Sullivan-type sedex mineralization at ~2000 ft depth
- **Greenwood Gold Project:** Gold City Industries have announced that they have received ~\$2.1M in proceeds from the Ocean Resources Capital Holdings Plc which will allow them to commence exploration drilling on their Lexington and Winnipeg-Gold Crown Au-Cu properties in the Greenwood camp to confirm and expand know resources as a first step in their development plans.
- **Silver Lynx:** Cassidy Gold Corp. have submitted an NoW for linecutting/IP and up to 7500' in 15 diamond drill holes on their Silver Lynx polymetallic massive sulphide project west of Nelson.
- **Snowshoe:** Kingsman Resources are planning a trenching program on this property which covers part of the past-producing Skylark deposit.
- **Vowell Creek:** Jasper Mining Corporation is planning on drilling 7 more holes in the current phase of their drill campaign on their polymetallic Vowell Creek project which surrounds the past-producing Ruth Vermont mine west of Golden. The work program has just been halted in response to the ban on backcountry travel.

Subject: D.Terry Report, May 9, 2003

RG Activity:

- The "**Golden Opportunities in Southern BC**" symposium held in Cranbrook May 2-4th was a big success. There were over 90 attendees comprised of East and West Kootenay locals as well as delegates from Vancouver, Kamloops, Calgary, Spokane, and even Denver. A list of speakers is included below for your information. The field trip run on the Sunday had about 20 people looking at core from Chapleau's Lookout drilling at the Vine property and 11 made the trek up Lookout Mountain to look at the trenches in the snow.
- Responding to requests from MLAs on mining/exploration info
- Responding to inquiries regarding gold properties in Region
- Exploration tracking /monitoring - From the somewhat limited info I have to date there should be more than \$5 million spent on metal exploration alone in the Kootenay Region. No info on coal yet - will get this in June at time of Sparwood coal symposium
- Continuing new office setup issues - computer linespeed is SLOW - should be fixed in next week or so
- Visit to Sedex Mining's MW property where prospecting has discovered a number of new gold showings in an area with little exposure

Exploration and Mining News:

- Chapleau has recommenced their drilling program on the **Lookout Zone** (Bar 19 Property) west of Cranbrook. They are now on hole 10 of the program. Despite the fact that coarse gold has been identified through check sampling and metallic screen fire assaying of two sample size fractions, significant gold values have been attained in a number of the holes released to date. Ongoing drilling and geological mapping is beginning to unravel structural complications and it is now evident that the important syenite body below the Lookout Gold Zone is much larger than previously thought and the north edge of it - which is the most mineralized in the surface trenches - has yet to be tested below a flat fault at depth.
- Chapleau are planning a significant trenching and drilling program on the **Zinger** property near the headwaters of **Perry Creek**, a significant placer creek, as well as a trenching program on the **Jackleg** property. Chapleau have indicated that they intend on spending \$2-\$3 million on their **Cranbrook Gold Project** this summer, which includes the Lookout Zone. They now have about 500 square kilometres of tenure in the Cranbrook area.
- Klondike Gold/Sedex are planning on commencing their exploration in the Cranbrook area either later in May or in early June. They intend on starting off with exploration on their gold properties, including **MW** (soils, VLF, mapping, trenching), **St. Joe** (East along strike from Chapleau's Lookout Zone), **Thea 17** (drilling), and **Prices Pit** (drilling) and **Quartz Mountain**. They have ~\$400K at present and are raising more. They will continue with their sedex exploration program later in the season.
- Sultan have indicated that they are planning a Phase 1 program of \$1.12M for **Kena** to start later this spring, and a total of \$3M subject to results of Phase 1. Work will be carried out on a number of zones on the property including the newly identified "High Grade Magnetic Corridor"
- Gold City Industries is going to be commencing work on their **Greenwood Gold Project** imminently. The work will involve drilling to expand/confirm resources on the **Winnipeg-Golden Crown** properties, trenching to obtain metallurgical samples, dewatering of the **Lexington** decline, and making modifications to the Roberts Mill south of Greenwood.
- Tuxedo Resources is commencing a surface program on their **Franklin Camp** Au project north of Grand Forks.
- Kingsman Resources have optioned the **Snowshoe Property** in the Greenwood Camp from John Kemp and three others. The property covers part of the past producing Skylark Mine.
- Jasper Mining Corporation is planning a 2500m-10 000m drill program on their **Vowell Creek** polymetallic property and will spend approximately \$800K this year
- First Cypress Technologies have optioned the **Eddie** Au property at the headwaters of **Weaver creek** (another placer creek which is a tributary to the Moyie River) and are planning a work program this summer.
