SOUP

Aug. 24/96
+25
Sunny +15°C

Fly over property (on route from Joff)

- setting up 2 drill stations near top of ridge (I below the other). Note: Lower drill set up 'near' 89-2

Planned 4000 ft. ~ 9 holes = 0.5 m

all holes drilled to test NE cross-structures (up slope from massive mag. bed) + above 89-2
- 1 hole on South end.

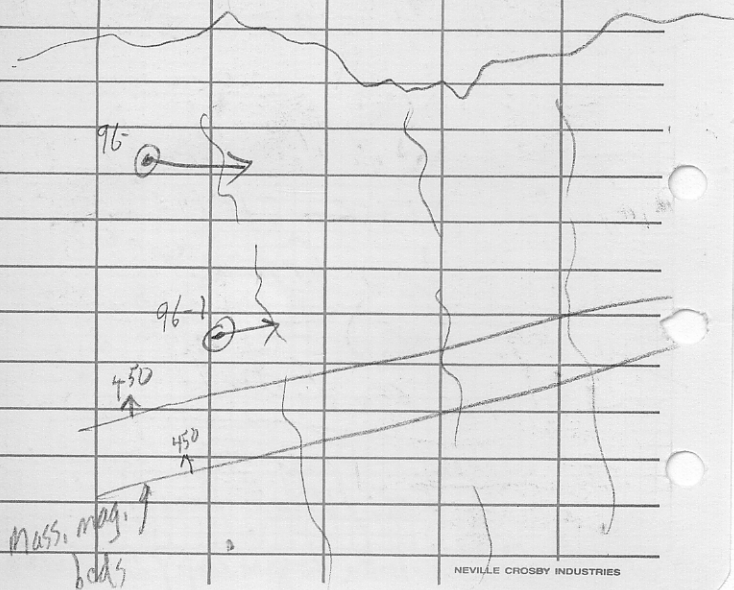

Jane Howe - Discovery Corp. on behalf of Wildlife Res. / Vital Pacific

- Chopper from Osilinka Logging camp (25 min. over 4000 ft)

- large gossan along N end of
slope = gtz +ankerite
+ py in "blt".

- all previous core (incl. '95-4th)
stored in shack in valley
near Kliyul (by Hemo old)

96-1 - 167' - 197' Min. zone (massive
magnetite) i.e. not a 'skarn'
minor gtz veins in zone

[MI-940025] SOUP (1) Fri. Aug. 18/95
-940105
- with Paul Wajdak (driving)
- stay overnight (Thurs. 17th) in Hemlo
Gold camp at SE end of Johanson
Lk.

- Graham Gill + Linda Erhart + Gavin
- showing @ 7300 ft.
- snow on mtns.!
- tried to drill 2 holes from 2
set ups: both did not reach target
due to lack/loss of water. Second
hole in far assay from section (40ft)
from target. If no good results
- probably drop option

1/6m. of massive mag. + py.
95-4 22m - 38m

zone dips @ 30° into hillside
'95 drill 'highest' up slope
(way above 89-2) - but intersected
another 'bed')

Fly Around

Aug. 18/95

① look S over Durb Lk.
(John prop.)

② look S to Pacific Sugar zone
(left of large glacier) cliff

③ Pacific Sugar starn - ^{high take}
_{orig. pos}

④ Kli drill camp - look W

⑤ look SE over N end of SARP
- zone @ 30° into hill

⑥ 89-2 hole area

⑦ look NW over MARIPOSITE

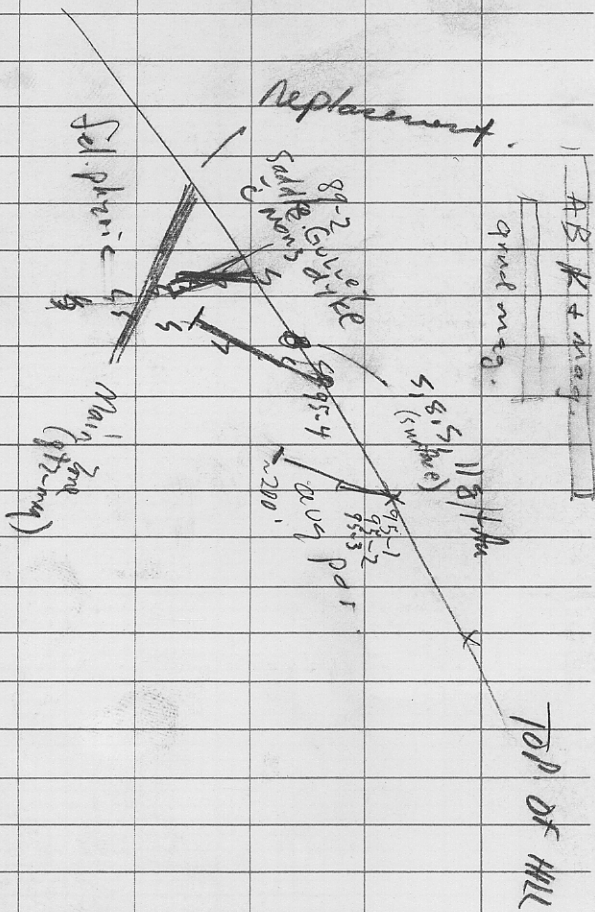

(trend N-S asterisk)

⑧ Glacier strike zone sheeted, etc

⑨ - look NW (at toe of glacier)
- lake in block.
