

# INFORMATION FOR B.C. MINERAL EXPLORATION REVIEW 1994

✓  
VBS → SOUP  
887799

PROPERTY NAME: SOUP

NAME OF OWNER(S): HEMLO GOLD MINES INC.

NAME OF OPERATOR(S): HEMLO GOLD MINES INC.

PROGRAM STILL IN PROGRESS? No.

EXPLORATION PROGRAM BUDGET: 1994 : 750,000

CONFIDENTIAL:  CAN BE RELEASED:

(If confidential will be used only as a portion of the overall NWBC total)

WORK DONE: (In particular, number of drill holes and total meterage; meters of U/G development; geophysical, geochemical, geological surveys)

Geochemical: 140 soils; 150 rocks. / LINE CUTTING: 2.6 line kms.

Geophysics: 6-15 kms of mag. / GEOLOGICAL: 2.0 sq kms mapping

@ 1:5000 scale.

COMMODITIES: (eg. Au, Ag) AU-CU

POSTULATED DEPOSIT TYPE: AURIFEROUS MAGNETITE STOCKWORK

COMMENTS (Significant results, zones tested, short geological description):

Highly anomalous Au-Cu in soils were returned from an area underlain mainly by NW trending, NE dipping (30°) andite porphyry flows intruded by diorite + monzonite plus + dykes stratigraphically + topographically above the previously tested magnetite-prite gossan zones. Mapping + sampling of this area has revealed that more <sup>structurally controlled</sup> magnetite-prite mineralization exists within the geochemically anomalous areas.

COMPLETED BY: D-G-GILL PHONE # 684-9246

NOTE: Any additional information concerning the geology of your property would be appreciated.
