Scale

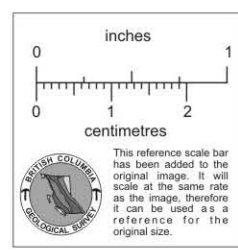

KLI CLAIMS (Hemlo Option)

Magnetite-Chalcopyrite-Gold Mineralization
Indicated reserves prior to option: 2.4 million tons 0.06 oz/ton gold, 0.45% copper, 0.2 oz/ton silver. Hemlo has extended mineralization and discovered additional targets (92-93).

Legend

- 1 Kliyul original discovery
- 2 Drill hole: 0.2 oz/ton Au, 0.2% Cu/40m
- 3 Vein: 2oz Au/ton
- 4 Sheared volcanics: 1.68 oz/ton Au, 0.17% Cu/1m
- 5 Quartz-Magnetite: 0.73 Au, 0.25 Cu/2m
- 6 Magnetite rubble: 0.28 Au, 0.43 Cu/50m
- 7 Several samples: 0.2 to 1.8 opt. Au, 0.5 to 7% Cu
- 8 Several samples: 0.03 to 0.5 Au, 0.2 to 2% Cu
- Other economic grade samples and showings
- High gold (+Cu) geochemistry - on the Soup, much of it >1000p.p.b. Au
- SK Limit of geochemical sampling
- SK Skarn zone with magnetite plus Cu-Au
- DIORITE Diorite plus monzonite intrusives, principal source of ore?
- Faults - produce brecciation and localize high grade
- Magnetic contours
