93A/12E 93A043

Dec. 13/95

SPANISH MTDU.

- chat with Steve Parry
- very excited about low grade, bulk-minable potential
- last work (trenching + geochem) by Cogema identified "great" targets; unfortunately Cogema left BC - data filed for assessment \Rightarrow OPPORTUNITY for Cyprus
- early 1996: 10 large trenches across anomalies; Any encouragement = LARGE reverse circulation program (big \$).

Type	Date / Note	Time / Seq.	Subject	Response	Follow-up Date
			SPANISH MTN. - 10 minute drive	Likely	
			- NW flank of Spanish Mtn. [CPW claim + NW]		
			May to July trenching program (budget = 330,000 CDN)		
			+ optional 2,000 in dch program (to start late July or August)		
			reverse circulation?		
			Trending on CPW claim oriented NE-SW @ 200m spacings.		
			Geology & veins trend to NW-SE (~135°).		
			Host rocks are "Nicola type" phyllites etc. w/ barrow texture (weathered out pyrite) but contained sp-sulphide veins and intersections of up to several g/t Au.		
			Likely Forest Office or Hasefly F. office - Likely approved the project & Hasefly held it up.		
			Main quartz veins contain abt 1.0 g in vuggy, boxwork zones		
			3 people on site to lay in grid work, etc.		
			[Note: Cogema had identified "great" targets in '94 (prior to leaving BC - Steve Parry)]		
			1994 resource est = 950,000 tons @ 0.056 g/t Au [53,200 oz Au]		
			1992 - 700 tons are mined & stockpiled -> 350 tons to Premier mill; 116 tons to Bow Mines (Greenwood) => "severe nugget effect"; 96-97% recovery		
			~105 oz @ GREENWOOD		
			~46 oz @ PREMIER

SPANISH MTN. Dec. 14/99

- chat with Rob Cameron
- Mount Polley^(Imperial Metals) "close" to making a deal with Bill Norton on the Spanish Mtn. gold deposits i.e. to develop + process at the mine (to upgrade Au conc.?)

SPANISH MTN. Feb. 14/06
- Brad Aelicks
2006: Phase One
= \$3.5M, 30,000 m³
(by end-July) ddk TS

SPANISH MTW

Aug. 16/00

- talk to Bill Manton
- recent Press Release

2.1 g/t Au av.

VS [3 g/t Au - processed]

2100 tonnes
mined
(officially)

(unofficially - more)

McKewan pit →

→ Cedar Cr. St. Venture
esp. → Armada claim
(GCPW - Carolin Mines d.d.h.)

Style : i) fsp por related

N-S 'trend'

ii) silty, shale units (structural)
→ stratigraphic control (mantle-style)

iii) gtz 'sweats' / ± veins 'micro gold'

[ref. : 1996 AR - Cyprus]

SPANISH MTD

Oct. 5/00

- chat with Glen Barratt.

- Imperial Metals very pleasantly surprised about amt. of gold recovered from pit.

→ gold assoc. with XrFe
(plus free gold) in GABBRO
(not sure where gabbro fits into
geol. section).
