Mr. J. W. Morton, P. Geo.  
Eastfield Resources Ltd.  
110 - 325 Howe Street  
Vancouver, British Columbia  
V6C 1Z7

Dear Mr. Morton:

I followed up you letter and our telephone conversation with a visit to our lab.

The sample was labeled "For Ar-Ar age determination" by Tom. We cannot do that type of analysis because no commercial labs exist and our university sources will not do commercial analyses.

I instructed Ray Lett to put the sample through processing to have a potassium-argon age determination done. At the same time, one of our project geologists will attempt to convince Dalhousie that it is a viable research sample.

I will keep you posted on progress

Yours sincerely,

W. J. McMillan, Manager  
Mapping & Resource Evaluation
