

SPUR - Lucero
2000 soil

(66)

samples and 100 rock samples to evaluate the potential for Volcanic Redbed copper mineralization on the property located west of Bear Lake (and south of the Chaco Bear property). The program did not produce any significant new targets.

Tass. Lucero also evaluated the Tass claims, immediately west of the Spur property, for Cu porphyry mineralization. A 1000-sample soil geochem survey did not produce encouraging results.

Kaza and Northstar. Everest Mines and Minerals is attempting to secure capital for Fall drilling programs on their copper properties, located approximately 30 and 40 km north of Takla Lake.

Jean. Continental Copper has released assays from the first hole (J97-4) in the B zone including a 76-metre interval that averaged 0.44% Cu and 0.014 % Mo. Drilling continues.

Other

Premiers Summit on Jobs in Northern BC. Working with several individuals to produce poster display highlighting mining and exploration (and job opportunities) in the north.

Maintainance of rocksaws ongoing: bearings in big unit replaced at a cost of \$45.

Have 11 names for a Spring 98 Basic Prospector Training course for Prince George.

Upcoming

RG meetings in Cranbrook, Oct. 6-10, inclusive.

Bob.

Distribution:

- TO: Ed Beswick of EI (EBESWICK)
- TO: Ken Macdonald of EI (KFMACDONALD)
- TO: Jamie Pardy of EI (JPARDY)
