Thanks John, I gave Craig copies of everything we have here regarding the Wigwam property. I checked our Placer Dome database and there doesn't appear to be anything on Wigwam in the files we got from them.

I think 'rescued' is a better word than 'raided' when it come to the BCGS' Placer Dome files. PD was going to throw them out and one of the geologists told me to come quick and take what we wanted. We took as much as we could...two truckloads with more than 60 file boxes of mainly BC reports! PD kept a lot of stuff and shipped it to Reno so that's probably where those drill logs and sections are.

Tom,

I am now collecting data on the Standfast. Have received data from Craig Lynes, Teck Cominco, Victoria GSC Library and BCY Chamber historic files. Am now chasing down Tom Tough (lunch today) and Gordon Gibson as they are both reported to have info. Also Placer's Reno office may still have Canex's 1969 drill information from Standfast (8 holes, 5000 feet). This drill data was originally in their Kamloops office which was "raided" as you are aware - it is important data to have.

If you have any other ideas on where Standfast data may be located please let me know.

Regards, John

Ian, Thanks for looking. I have the Starr 1933 report. Also, I have received a huge amount of data from Thomas Tough and from Cominco. In addition Placer US has sent me a two page list of data that is in their Reno Library. So all in all I have done very well. Best regards, John Chapman

John,
I looked through the Placer Dome index (
<http://www.em.gov.bc.ca/Mining/Geolsurv/Minfile/propfile/placerdome1.htm#082K>)
for Wigwam (MINFILE Number 082KNW068) and could not find anything. If you see something of interest please let me know.

Did you view the Wigwam material by C.C. Starr (1933) in Property File here in Victoria?
