

## STORIE (MAGNO)

On September 11, 1995 Paul Wojdak, Bob Lane and myself visited the 'old' Storie (Magno) Pb-Zn-Ag shear-hosted (in limestone) prospect located just south of Cassiar. The property had previously been explored by Coast Silver Mines in the 1970s and by Shell (esp. good 1991 Summary Report, 1991) in the late 1980s-early 1990s. David Brett, representing the current owner, Pacific Bay Minerals Ltd., and 'local' prospector Robert Storie (son of legendary Bill Storie) very kindly toured us around.

The access roads to the property are still in relatively good shape. Grades of up to 198 g/t Ag over 2.8m are reported. Pacific Bay is currently evaluating how to proceed on its newly acquired property, with over 500,000 tonnes of drill indicated reserves in the Magno and D zones.
