

## The Mining Story of 1996

Surrounded by producing gold mines, Navarre Resources Corp. owns 100% interest in, various prime properties in one of the most highly mineralized areas in the world :

### B.C.'s Golden Triangle

#### Marmot Claims

- \* Next to Tueton/Minveta discovery at Red Mountain
- \* Similar geology and structure
- \* Assays ranging up to 2.25 oz/ton Gold and 8.23 oz/ton Silver
- \* Summer drill program planned

#### Rox Claims

- \* High Grade Gold up to 7.268 oz/ton Gold
- \* over 1500 feet strike length and open in both directions
- \* Visible free Gold
- \* Spring drill program planned

#### Jacobie Lake

- \* High Grade Disseminated Copper property.
- \* weighted average grade 1.42% Cu over an area of approx. 4,500 X 4,500 feet.
- \* easy access and topography
- \* Next to the Mount Polley Mine, near Williams Lake B.C.
- \* Late spring work program contemplated

#### Strike Claims

Facts indicate great potential for Major Gold Discovery

- \* Geology is similar to that of Eskay Creek, a multi- million ounce gold deposit.
- \* Massive sulphide indicators present.
- \* High grade gold, silver and base metal mineralization already discovered.
- \* Easy road access, close to mill, low production costs.
- \* Knowledgeable, Experienced Management
