NOVEMBER 4 - 6, 2001
KIMBERLEY, BRITISH COLUMBIA
C A N A D A

The City of Kimberley is home to the Sullivan mine, which will be closing later this year after nearly 100 years of mining activity.

Teck Cominco Limited, the City of Kimberley and the World Bank, will host the Sullivan Round Table, an international gathering of experts and representatives of communities of interest to examine the social, environmental and economic legacy of the Sullivan and other mine projects. While the Sullivan mine will serve as a focal point, other case studies, including the Antamina mine and Placer Dome's Porgera and Misima mines will be discussed.

We will explore the latest practices and policies designed to promote sustainable approaches through all stages of the mining process. A round table format will be adopted to encourage a lively and open dialogue and the sharing of experiences and perspectives of all participants. To accommodate this approach, the number of participants will be limited.

Kimberley, with its crisp mountain air, is an ideal place to re-energize and refresh our outlook. We have allowed time in the program for you to see what is happening in the community to ensure a sustainable future after mining. You are also invited to tour the mine's reclamation activities and view, first hand, what is being done to return the land back to nature. The program will also provide an opportunity for you to enjoy some informal networking where you can meet with colleagues, peers and leaders in the field of mining and sustainable development.

The Sullivan Round Table will be an informative and interactive program enhanced by a spectacular setting and a "living" example of mining and sustainability. We look forward to welcoming you to Kimberley, and this unique event.
