Message

Tom,

Thank you for inviting Billiton to give a presentation on the Sullivan area exploration during the upcoming "celebration" in November.

I can hereby confirm our intention of presenting a talk that will be geared towards the Rio Algom as well as the Billiton work in the last couple of years in the Cranbrook camp. We have selected "The search for the next Sullivan - New thoughts and exploration approaches" as the title for our talk. I hope to be in a position to give the presentation at the meeting and will outline why we have picked the Sullivan area as an area of zinc exploration, our reasoning and exploration approach, results and potential areas of future exploration (from our perspective).

Could you please advise when an abstract would be required or any other specific dates that I would need to keep in mind.

Thanks again for the invite.

Regards

A handwritten signature in black ink, appearing to be "Sig Weidner".

Dear Sig:

Re: SULLIVAN "Celebration" in November

Thank you very much for your confirmation regarding your intention to present a talk entitled "The Search for the Next Sullivan - New Thoughts and Exploration Approaches" at the Sullivan "Celebration" on November 9, 2001 in Kimberly, B.C. Your outline is exactly the type of thing that the organizers are hoping for to stimulate future exploration and discovery in the camp.

A "first notice", with the preliminary program, of this significant event will be sent out to participants (i.e. presenters) shortly. This will be followed by an extensive 'advertisement' throughout the world. As soon as I find out about an "Abstract" date, I'll let you know.

Welcome aboard!

Yours sincerely,

Tom G. Schroeter, P.Eng./P.Geo.
