SULPHURETS - Norm Tribe

1986 - 22,000 ft. in 47 holes for ~ 20m spacing - West Zone
Costs ~ \$34/ft - all incl.

Younger K-spar phenox. 'porphyry' (à la Premier porphyry)
could be source of hydrothermal solns. + mineralization?

June 23/86

SULPHURETS

20,000 ft.

+

1200' u/G - decline

into

FW + camp back into zone → mid-Aug.

Granduc back in - 40% (new directors)

- go thru winter

- fly fuel in - Okanagan 5-61 chopper

- 40m drilling now - next - 20m

- Fern Boissvenue drilling

SULPHURETS

Jan. 16/86

- talk with Fred Hewett + Norm Tribe (Northair Sp.) - in Van.
- discussed getting colour slides made of:
 - property geol. (thru Vic.)
 - X-sections (thru Vic.?)
 - duplicates from Norm (esp. 1986 camp, Snowfields Zone)

Snowfields Zone - alt'd (ser. - albite?), schistose volcanic
(i.e. not intrusive) - An apparently tied up with(in) py.
(rather than gte. stkwk.)

Brucejack Zone

- 1985 was drilling only (i.e. no prospecting)
- 2 holes on Gossan Hill were on a 'vein' near NW 'extension' (offset?) of West Zone
- Prelim. depth testing of Peninsula Zone (Shore Zone) in Brucejack Lk. suggests deep (i.e. >200 ft. water) ∴ tough to drill from ice - better to have decline from north + come back under lake
- good slides of 1986 camp with drill nearby drilling SW under West Zone
- Northair has not seen cerargyrite on Gossan Hill

New 1986 Discovery - just west of Sul. Bx. Zone

- chopper support from Stewart - i.e. no float plane to B. L.
- Esso camp moved up to Brucejack Lk.
- core left + starting to fall over

- 1986 Plan: \$2 m drilling/expn. program
 - walk large bombadier into prop. from Hwy 37 (approx. 51 km.) - see sketch over! - involves + 10 km stretch over glacier (smooth) - spring '86
 - check with Dani Aldrick for new age dates?

BOWSER LAKE

38

check with Dani Althoff for new data?
started over glacier (smooth) - spring '88
(off road, 21 km) - see sketch over! - involves a lot
- walk large pan pack into prop. from hand 37
- 1988 Plan: at 2 m drilling depth. Program
- care left + starting to fall over
- 7500 camp moved up to Brucejack Lk.
- chapter support from Stewart - in no floodplain to B.L.
- New 1988 Discovery - just west of 2nd Bx. Care
- Northern has not seen ceratophyte or Gosson Hill
