SURF INLET

689-9931

- John Michell

1986 Budget - \$235,800

- 4/G rehab. for mapping, sampling (no drilling)
on 900 Levels

- eval. of tailings + site facilities

Comment: - "Initial attack" program to re-open
+ gain access to 4/G workings - necessary
start but will not add to mineral inventory
(i.e. no drilling planned in initial phase)

- evaluation of tailings + site facilities again
will not add to mineral inventory but is necessary
(actually tailings potential is interesting)

Recommendation: - No grant for this
initial phase

- Consider very strongly for grant & s
follow-up program. (i.e. their stage 4)

- Good Au potential here!

Financing? - How? Who? When?

TGS - revised scoring - 590

Note: Yellow Giant project should get
grant in lieu of this proposal
