**WINDPASS & SWEETHOME - Gold**

*Windpass portal and drainage*

**The Windpass and Sweethome Gold Properties**, are located 50 kms northeast of Barriere, B.C. The property consists of seven contiguous mineral leases totaling 389.34 hectares, which are valid until the year 2020. The Windpass and Sweethome are past gold producers with the Windpass producing 34,456 ounces of gold from 102,996 tons milled over a six year period from 1933-1939. As per a geological report by N. Tribe, P.Eng. (2003) eighteen additional parallel zones exist with the potential for deposits similar to the Windpass and Sweethome.

**FLAP - Gold**

**The Flap Property** is located 29 kms northwest of Kelowna, British Columbia it is a joint venture with Goldrea (50%). Previous work on the Flap Gold Property defined a mineralized area measuring 650' x 870' with a depth of 700'. Surface sampling returned up to .770 oz/ton gold and 8.7 opt silver with a previous diamond drill hole returning 2.25 opt gold over a one meter section. The property has the potential of hosting a large reserve in the .03-.05 opt gold range.

**DOBBIN I - Platinum, Palladium & Copper**

**The Dobbin I Property** Located 27 kms northwest of Kelowna, British Columbia and adjacent to the Tadpole Lake property, the Dobbin I is a 50/50 joint venture property, with Goldrea Resources Corp. ("GOR:TSX.V"), consisting mainly of rock of the ultra basic suite, which is wide spread over the property and is the main host of the copper magnetite mineralization with platinum and palladium associations.

Diamond drilling by the companies in 1997 and 2003 returned up to 111 m @ 0.410 g/t Pt, 0.352 g/t Pd and 0.190% Cu, (includes 15 meters grading 1.316 g/t Pt, .949 g/t Pd and .54% Cu) in hole # 97-21 in the Central Zone. In 2003 diamond drilling on the Kenny 2000 zone returned 0.63 g/t Pt, 0.440 g/t Pd and 0.19% Cu over 3.0 meters. The companies plan to concentrate their efforts on the main zone measuring approximately 1.5 x 1.5 km where previous work by Cominco identified copper mineralization on the margins of the peroxinite unit. The Main Zone is located 200 meters north of the Central and Kenny 2000 zones.

**DOBBIN II - Molybdenum**

**The Tadpole Lake Molybdenum Project** is a 50/50 joint venture with Goldrea Resources Corp. ("GOR:TSX.V"), located 27 kms northwest of Kelowna, British Columbia and adjacent to the Dobbin 1. Cominco held this ground for 20 years. Between 1977 to 1980, Cominco completed a total of 73 percussion holes (19,026 feet) identifying a significantly sized anomaly. The property hosts a quartz stockwork and molybdenum soils anomaly measuring approximately 1000 x 1500 meters. Prior work by Cominco, in 1978, included the drilling of widely spaced percussion drill holes with results up to .105% MoS2 over 56 meters. With the current price of Moly at \$34.50(US)/lb, the Tadpole Lake property has become a significant focus for Molycor. The company is currently instigating the potential of a drill program to test the economic potential.
