

TAM (N. of Laramie) Sept. 5/00

- chat with Steve Wetherup (Phelps Dodge, Van)
 - [current owner - Lorne Warren]
- examined in 2000 - intrigued by magnetite (oxide facies) content, plus more mafic rx. (eg. gabbro)
- magnetite (porphyry / volc.)
- breccia - host (young monzonite)
 - cutting more mafic (incl. gabbro)
 - + massive magnetite
- [cf. Similco, Mount Valley, Galore Cr., Laramie]
- good recent logging access!
- (also - nearby Tenahiki of Van from Lorne Warren)
