I am writing at this time to extend an invitation to you for our presentation that will highlight **International Taurus Resources**. **International Taurus**, of which **Hera Resources** is a majority shareholder, is in the process of defining a large open-pit gold mine near Cassiar, in Northern British Columbia. Preliminary results continue to indicate that a large open pit gold mine is possible. The company is very encouraged by the consistency of the grade which is essential to a commercially successful operation. Both companies presently trade on the Vancouver Stock Exchange under the symbols (**HRR**) & (**ITU**), with **International Taurus** currently filing documents for listing on the Toronto Stock Exchange. **International Taurus** is also in the process of researching a listing on the NASDAQ or American Stock Exchange.

This presentation will focus on recent activity at the Taurus property and will give you the opportunity to ask management and Cyprus Amax exploration staff in-depth questions about the operation. We will also have the latest core samples and section maps on hand for you to review.

I hope you will be able to attend our presentation, in the likelihood you are not able to attend, I would ask that you forward your invitation to an interested colleague within your ministry.

If you have any questions in regards to this presentation, please contact me at (604) 681-9558 (Mon.-Fri. 6:30am - 1:30pm PST).

I look forward to see you on November 8th.

Sincerely yours,
International Taurus Resources Inc. /
Hera Resources Inc.
