TEXADA June 20/03
~~Little Billie~~
Stan Beale - Robert Pinnat
has identified a Grasberg
setting based on age of
intrusions + terrane boundary.

TEXADA IS. June 13/87

- VANANDA

- Giles Peatfield, Stan Beale,
Larry Dick, Gerry Ray,
Dani Aldrick, Cathy Lund
Art Etlinger / Mike Hessite

- silver & lead tellurides along
pyrite grain boundaries in
Ideal Cement pit Quarry

- semi-massive sul with
PbS ZnS + .25 oz Au + silver

→ mantle-type - pipes with
crse calcite rims

→ low-temp. replacement
(not skarn)

→ spatially assoc. with 1st-vol.
contact

- Possible 3 phase

1) early mafic (gabroic) Qtz-Di - 3) Fsp pr

- wollastonite present (+bn)

↳ wrightite texture - banding

QUESTION - comparison to Whitehorse Copper
LEVEL (S)

CUNCIH

- Cornell Mine

Bleaching is assoc. with de-chlorination (ie, squiggly black carbon (+ v.g.))

- Copper Queen Mine

Ed Johanson - Holly / Angel

- LITTLE BILLIE MINE - wollastonite dump + MoS₂ ± bn

John Stenmit / Richard Grainger
Holly - Gary Buenaento / Richard Grainger
- shearing + Qtz + v.g. + epv
- photo of lower (old) adit

← original vein disc.

- very small shear vein with 2 sphys

- Bolivar mill shut down

SENTINEL SHOWING -

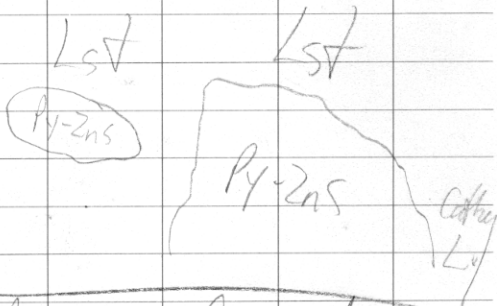

- ankerite - PbS - veins + py
- + karst topography

~~* Send memo to Janet Gabriotes
✓ re - 2 Dog Pb-isotope samples~~

IDEAL CEMENT QUARRY

- mantle ZnS - p' surrounded
by coarse calc.
- brown Fe-rich ZnS

Photo

Question use of word
'mantle'

Prescott Mine (Pit) - 'classic' iron
- Photo skarn

COMMENT

- distinct lack of silicification
(i.e. gta, veinlets, etc.)
