RE: Texada Island Limestone Project Prospectus

I have reviewed the above-named prospectus and have not identified any significant technical or policy issues. My recommendation is that the Geological Survey Branch should encourage this proposed new quarry development. Texada Island is one part of southwestern B.C. which is in particular need of an economic boost. The proponent is quite correct in its assessment that there are many unemployed but experienced quarry workers still resident on Texada Island who would welcome the opportunity to get back to work.

H. Paul Wilton, P. Eng.
