OK-I'm aware that you have this interesting property. Tom.

Hi Tom,  
I am looking for a home for the Tip claim(high level porphyry Au-Cu system),  
located about 10 miles north of Trail Peak, just south of Charleston Creek:

<http://www.geolisting.com/keepout/framep.htm>

Thanks again,  
regards,  
Robin

Robin, Frank Nelson visited my office this past Monday (16th) and we discussed the program - sounds great. He extended an invitation for me to visit towards the END of the program. I said that I would be most interested; tentative timing, now, is late September/early October. So - maybe we will be in Smithers then. As for the Tip, thanks for the info. Tom.

<<File: TIP PICTURE\_.doc>>

Hello Tom,

For your information and files- in case you are flying north of Trail Peak and would like to visit this porphyry system, attached is a photo of the Tip porphyry system. Its not often that a porphyry is exposed like this-I am surprised that it was missed.....also, I have a one page summary which can be viewed on the Tip property file on:

[www.geolisting.com](http://www.geolisting.com)

I have not yet received a countersigned agreement from Freeport. I will let you know as soon as I do. Unfortunately, I won't be up in the Smithers area when you plan on being there. I do plan on coming up to Smithers to see some core after Frank's drill program, but I don't think that will be until late September or October sometime.

regards,  
Robin
