888810 VGS → THUNDERBIRD

## Table To Canada Locations Property INDEX

GEOLISTING <sup>©</sup>			
THUNDERBIRD	Zn Pb Ag Ba	VMS	BRITISH COLUMBIA
<b>Geology:</b> The property includes the historic Nifty occurrence discovered by Consolidated Mining and Smelting in 1929.			
<b>Mineralization:</b> Bedded barite is underlain by massive sulfides at the contact of felsic tuff with intermediate volcanic breccia.			
<b>Work:</b> Several shallow holes by Pan Ocean Oil and Imperial Metals Corp. in the Main Zone and in the footwall. Rio Algom drilled a single deep hole 300 metres to the northeast. Most of the favourable stratigraphy remains unexplored.			
<b>Results:</b> Trenching has included 45% barite with 5.8 oz/ton silver over 14 metres and 6.4% zinc and 4.8% lead over 4.9 metres. Extensive dyking in the target horizon at the Main Zone has foiled drilling. The target horizon at the trench zone has not been drill tested.			
<b>Property Details &amp; Access:</b> 80 claim units encompassing 5,000 acres (2,000 hectares) Access via highway 20 from Hagensborg (Bella Coola) approximately 40 km from tidewater at Bella Coola, approximately 10 minutes flying time (helicopter) from Hagensborg/ Bella Coola airport.			
<b>Detail Location:</b> Skeena Mining Division, central coast, British Columbia			
<b>Other Comments:</b> An option partner is sought to fund a 1999 drilling program.			
<b>Vendor / Contact:</b> Bill Morton/ Glen Garratt Wildrose Resources Ltd. 110-325 Howe St., Vancouver, B.C. V6C 1Z7 Phone: (604) 681-7913 E-mail Address: etfvse@direct.ca
