

Tulsequah Chief (Aug. 4/04)
 - Bob Carmichael
 '04 - 30,000 m ddh
 to end '03 - spent \$28M
 327 Ma
 - deep drilling = 2nd (new) leg
 Am. Inst. 91koz Au Equiv.
 Snetter: Pb - 4%;
 Zn - 40%, Au - 28% Cu - 24%
 Ag - 18%

Ancillary: Myra Falls
 - excellent metallurgy
 - upside opt'n pot.
 102 + 106 holes ('04)
 \$'s ex cellat - 29.30m

ADANAC (Dave Philip)
 - Aug. '04
 90-95% recoveries
 to roast to molybdenic oxide
 * Ship from Skagway

METRA (Dave Tupper) Aug. '04
 gold 'target' (APB + Ent + Act)
 3 other JV's with Aphel
 1991: 10 ddh (Galicia)
 carbonate-shear veins (199)
 Heterolithic box
 Veins in diorite
 to Au assoc. with pyrope + garnet

Yellowjacket (Gyulalund)
 - Muskox Minerals Aug. 7/04
 - Anorogenic mesothermal
 Qtz vein style (after Au)
 - most of Au in strike-slip
 Analogy: Maryland, Calif.
 - mineralized diabase (eg. in
 fault zone) - frags. with
 Qtz + carb + gold

104 ddh - upstream of Discovery
 - near Gold Run
 Pine Ck fault ~ 50m-wide
 dip to SE => drill to N.
 is drilling down dip extent of fault.
 300m strike of drilling
 - computer modelling of all ddh
 Hasti: alt'd ultramafics (ulcan)
 - Muskox using Homestake core

14 ddh by Muskox prior to Spring '04
 - Gold in: i) Qtz veins
 ii) briswanite (stibnite)
 iii) silica - floued (carbonate)
 ultramafite (+ talc)
 iv) diabase
 - extreme nugget effect.
 -> continue in-fill ddh
 - ddh to depth
 - airborne survey
 - bulk sampling of shallow
 ddh intersections

TITAN (Adam Stevens)
 - Rima Fire Aug. 4/04
 - new oban bx - JP target
 Regional: 82-93 Ma rocks
 ddh in Sept. (Darcy Baker)

TITAN (Chris Sanger)
 - Koboo Res. Aug. 4/04
 203 d'isc.
 due to ice melt (glacier)
 Late Crd. Gd. @ contact with
 metaseds
 - Au - nearby (.27 to .75%)
 - Mo - up to 1.9% Mo
 JP survey: N-S chargeability
 2004 work
 - further JP - in fill + foli
 - 500 m ddh (2 holes)

2nd Atlin Geoscience Forum
 Aug. 4/04
 Tom Schrock
