

July 18/88  
Sunny 15°C

888974

TROPHY

- drop in from Galore Ck.
- Doug Forster Greg Dawson
- Bob Lane
- ~~Stacey~~ Sylvia Heinrich
- Peter Read

Photo - Looking NW over Ptarmigan  
Zone - Ambition Mtn. to right  
(035° structure) → 'later' ~~than~~  
ie. crosscuts 325° structure  
Hydrothermal → good permeability!

Photo - Breccia with py (+As)  
- with grey chalcedony veinlets

- Monzonite is highly epidotized  
(veinlets) & chloritized (matrix)

Photo - Looking NW over 'A' Zone,  
Ptarmigan structure

- frags. are well rounded 'milled'  
(cf. near border of bx)

matrix is Qtz + sericite

- Qtz veins with PbS-ZnS-py-arsenopyrite  
(+ electrum)

Photo - Veins with bleached envelopes in bx.

Photo Bx. with large well rounded  
frags. of 'intrusive' and 'folded'  
seals.

---

Even though getting 5-6 ppt Ag,  
still don't know what silver mineral is!
