Dear Paul:

Re: Tulsequah-Chief Property

I understand you will be in charge of a program on the Tulsequah Chief property this summer. I would like very much to visit the property when you are there. I plan on being in the area on three different occasions this summer: July 10-12 (Atlin); August 9-20 (Muddy Lake); and mid-September (Atlin). Is there any chance of arranging a one or two day visit while you are there? Please let me know how I can contact you this summer.

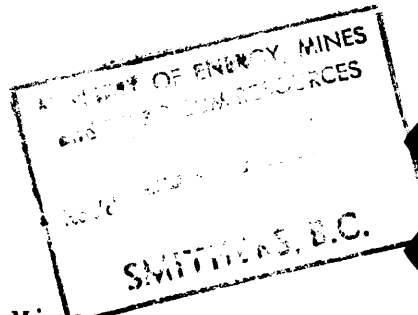

Thanks, Paul.

Yours truly,

Tom Schroeter, P. Eng.
District Geologist

TS/jh

P.S. How did the Pb-isotope data work out for Tulsequah Chief which I gave to Bob Sharp?

Dear Tom:

I recently received your letter requesting a visit to the Tulsequah Chief. I expect to have left for the summer by the time you return so I am writing to explain the situation. Due to a re-shuffling of personnel around here, my area of operation is now confined to the SLAVE province, Mexico and South America. Someone else (?) will be looking after the Chief in the future, however, I am still trying to obtain a joint venture on the property and presentations etc. are my responsibility at the moment.

There is no exploration program planned for the Tulsequah area in 1985. Falconbridge Copper has expressed a desire to visit the property, and they will be in Juneau on July 1,2&3. A visit at that time may be arranged through Fred Gill and/or Geoff Harden. If you are interested in visiting at that time, you should contact Fred as I will be swatting flies in the barrens.

Have a good summer

Yours truly,

J. Paul Sorbara
Geologist
