

83D 005

- with Cathro, Madu + Simard

Thurs. July 12/01
Sunday 12/01

VERITY (Carbonatite)

Verity 1+2 cts.

- Jeff Reeder (Casino-Maggie Dittford) + previous data

- 600 x 200m area
- Drilling after IPO [MI 83D 005]
- u/g room + pillar mining of sill
- dips shallow ~~up~~ ^{up} mt. (strike N-S)

Geochem: Ta + Nb in soils - works

(ICP) (pyrochlore). Also - panned conc. - av. 225 ppm Ta

- Mag survey traces 'zone'

upslope (E-W)

- drilling will target contact between

mag highs + lows.

IPO = \$0.25k
\$0.5 raised
\$0.07 spent to date
prior to drill

Total Budget \$0.3 (Verity + Fir) ~2300 m drill

av. 25m thickness

- north side of Serpentine Ck. (sig. logging rd. activity)

- columbite + pyrochlore

[Tony Mariano - PhD thesis]

- Paradise Lk. upslope to E - showing of alkaline carbonatite

889340

Amphibole (Rebeckite)
Apatite, Magnetite

LEVEL (S)

Photo - L. 38 - 'Upper' Showing

'Specimen' Pit

hexagonal apatite (clear) xls, plus
Photos ak. pyrochlore xls + mag +
rebeckite (sugary, weathered texture)

Photo - Pegmatite dyke cross-cut
carbonatite.

- previous drilling, 'missed' zone (from below)
Current drilling will be from 'above'

Other 'Competitors' - i) Cons. Exaggerated
ii) First Narrows to S (to E)
