

920/IE 920 051

889395 WATSON BAR (SECOND)

Tues. Sept. 17/96  
Sunny +23°C

- with R.G.'s
- Rudi Durfeld
- good views (photo) - looking SW over MAD prop.

1 km 75 Watson Bar Thrust Fault

zone - sheared / 'boudinaged' shale + ss with late-stage calcite veins X-cutting

- '96 Drilling on Zone V (13 holes ~ 5000') ~ 0.3m

Photo 96-11 1.764 opt Au @ 3.66m  
 (~160m down-dip)  
 @ ~150m → ZnS + PbS + native Au → 2.3 opt Au → deeper min. (i.e. not drusy)  
 + tr. cpx

higher grades in HW of Qtz 'vein' in Zone V

trenching in '96 extended 'vein' to east (79m total)

Photo - look NE from 'Lunch Point' (Marble Range - snow capped)

\* Note: Graphitic thrust material also X-cuts intrusive sill above 'Lunch Point'

Second Ck. (As-5b) Showing

Unfortunately zone V dips @ 15°  
into hill side, Will be tough  
to mine 4/6 due to bad ground.

① WATSON ~~BAR~~ ~~STAMP~~ (SECOND) May 27/96  
- with Mike Cather + Rick Meyers Sunny + 23°C  
- Rudi Durfelder - Stirrup Ck. Res.  
- rd. thru Lillooet 920/1E

AR 17,781 - MAD (11/ah)

AR 22,497 - Watson Bar (+ Cyprus data)

Current Research 1994 - GSC,  
8:10 - 9:40 p. 143 152.96.  
(drive from Lillooet) w. Pavilion

300k - 500k - First Phase

- Epithermal (agates) ep. Zone V  
(using "BC Epithermal model")

CARLIN-type in ~~the~~ local sed.

- incl. carbonaceous sed.

Ref: Harry Warren - <sup>+ Hask</sup> Western Miner  
(<sup>cont.</sup> ~1973) - 'Carlin-Cortez' + Ba  
Sb, As, Hg, Au

5m @ .5opt Au - best core assay

Tr. qtz, PbS - mainly VG + arsenopyrite + Py

- No Fluid inclusion studies done!

② Photos - look W over Second Cr.  
(3) to Zone V (back side of  
grey (over) rock bluff <sup>Hold Gd.</sup> - green  
(new <sup>spaced out</sup> growth) burn in foreground  
trailer camp in foreground  
- camp at Km 69

Zone V : 200m depth  
30-40m wide  
Trend NW, dip shallow <sup>15°</sup> SW

Photo - Trench by rd. with 1 opt. cu

Photo - Bedded gts + arsenopy + sericite  
cise 'bladed' veins in seds.  
(sandstone). - 8' wide zone <sup>~100' strike</sup>  
- 2 dth ~ 30m apart into 'zone' <sup>DDH 89-4</sup>  
→ 100 ton bulk sample from here <sup>89-1</sup>

Photos - look S from 'green' intrusion  
cr. bluff to trailer camp ↑  
over Second Cr. <sup>Hold Gd.</sup>

Photo Look NNE town  
over Bulk Sa. trench

WATSON BAR

③ New logging up Second (K  
(2 Cyprus ash) - up "Second Creek Mark"  
very gossamer & seds. (near intrusion)  
plus gtz + arsenopy zones  
(never sampled)

- Black matrix vein + py + arsenopy  
+ ~~REALGAR~~ REALGAR

+ stibnite(?) - 'found' by Tom S.

Sa. to Kambops for sawing
