94E 028

June 26/01

- meet with Mark Baknes + Henry Furmack (Rimfire/Equity) in RIMFIRE office (9-9:40am)
- gave xerox copies of my previous (1983) field notes, sample locations on geol. map + photos, from Monthly Rpt. (July '83) [- very appreciative!]
- MB compiled regional RGS + aeromag for complete Toodoggone area and northwards across Pittman R.
- large coincident mag low (with anomalous RGS)
- RGS 'anomalies' incl. <sup>(circular, ~2-3km diam)</sup> Au, Cu, Bi, Mo, As, Sb
- foliated intrusion (immed to south) - pot-source of Metals?
- mobilization + work ~ July 5-12th
- i) fly by float plane from Dease Lk. (± Caultfield; Wasdak)
- ii) fly by chopper from Kemess camp (ie. drive up from Pt)
- TGS suggested looking for Bi-Tellurides (w. Bi geochem. anom.)
- Target Type: Mesothermal quartz vein

8/22

Aug. 16/01

- chat (lunch) with David Caulfield
- Very pleased with July '01 recee (10 days)
- re-examined / re-assay sections of core (core racks fallen over)
- some secs. not assayed prev.  
eq. 80 m @ > 1 g/t Au!
- VG observed in qtz veinlets in phyllites ( $\pm$  arsenopyrite)
- Intrusive rocks to south (dated by Ian Paterson, Cominco as Cretaceous  $\approx$  90 Ma)  
i.e. Intrusion-related Au target (à la Pogo?) potential
- intrigued Glacier Dome (Dan McCoy & Helen? from PD, Anchorage off.) → site visit - end July

~~Barri~~

- good potential! It should work well  
- esp. over 'gossanous' area to north (across creek/valley) to north of area drilled (on Park els?).

WILLIAMS ROAD

June 2/03

- chat/lunch with John Mirko, Scott Braughton, David Stecker
- Package: IPO update + IPO (May/June '03)
- Mobilization/Access Options:
  - 1) by boat up Skeena River (BC Parks)  
DFO 'opposed' [abandon for now]
  - 2) Use Hyland Pass (airstrip) + camp as 'base'  
→ fly equip N from Sturdee airstrip;  
then ferry by helicopter (Interior Helicopters  
- Wes Luck) - use caravan <sup>fixed</sup> wing (Doug?)
- est. ~ \$/M expl'n exp. in '03
