Host Rock: Diorite with gts,  
veinlets - ab. epidote veinlets

Min. cpy, py - mainly fracture controller  
- pervasive propylitic alter. (them)  
- tourmaline not positively I.D.  
- trace po

Free gold panned from 'B' horizon subs

Photo - alt'd dlo. with gts (cpy)

1989  
001 : 9 shaft holes = 1500 m

Country Rk.: Taktla Gp. rhyolite andesite  
+ pyroclastics, XI tuffs

Note: 4 steps located on prop.

- diorite is commonly foliated, but  
sometimes difficult to distinguish  
diorite from volcanics.
