Dear Sir:

**Re: GEOLOGICAL RECONNAISSANCE
March 27 to 30, 2004
June Claims, Machlee Inlet
Gold River Area
Alberni Mining Division, B.C.**

A camp was established on the June Claims at the mouth of June Creek. Prospecting was done up June Creek about 400 metres and up to two kilometres to the east. Four rock samples were taken. Heavy underbrush made it hard to traverse some areas. Pyrite, pyrrhotite, small amounts of chalcopyrite and malachite were observed on and near June Creek. An old logging road travels northeast from the mouth of June Creek.

Although no major showings were found, a program should be initiated to check east of June Creek. Pyrite and pyrrhotite were observed throughout this area. Due to heavy underbrush, I believe it is likely there are many more showings in this area.

Yours truly,

Larry Sostad
