## Gravity Survey of Highland Valley

① a contour low parallels the valley ~~and~~ <sup>and centers in the valley.</sup>

Two basins occur as far as the survey went -  
 a circular one <sup>at the east edge</sup> ~~centers immediately~~ <sup>west</sup> of Quiltanton Lake, <sup>an oval</sup> ~~one~~ <sup>along seismic</sup>  
 line F-F.

② The contours bulge up the valley (Fault?)  
 which runs in front of Trojan (note - seismic  
 data (not shown on map) suggests shearing in  
 the same valley.

③ Seismic drill targets below Bethlehem may  
 be the Bethlehem / <sup>B</sup> ~~Quichen~~ <sup>contacts.</sup>

--- gravity ) A, B & C  
 --- seismic
