

Pey Stock

Phenos Qtz rounded local embayments  
edges partly resorbed  
stressed

unstable — A few kspar phenos — intergrn w matrix kspar  
microperthitic "clay" ± calcite altn  
Plag sericite calcite clay altn

cores more calcic + more altered  
edges partly resorbed

Complex oscillatory zoning where it is preserved

Accessory magnetite  
ep  
apatite

Matrix qtz kspar some plag (not always)  
variably aplite → fg
