Nicola

Mag Grp.

Coguihalla Pass

1966

Rock Name *brocciated Qtz - monzonite*Serial No. *4505*Locality *Mag gp., Coquihalla Pass*Field No. *M. 266-426*

Occurrence

Megascopic

Microscopic

feldspar & fersmag of Qtz monzonite shattered & sericitized & chloritized, Qtz is embayed by late gp. Fractures filled with Qtz and fresh orthoclase. Black opaque (magnetite?) is confined to alt. fersmag (hornblende?)

MINERALS	Approx. per Cent	Cut on dotted line to make clip for section.	Analyst	Date
<p><i>plagioclase (-) Ab₇ An₃</i> <i>orthoclase</i> <i>Qtz</i> <i>sericite</i> <i>chlorite</i> <i>amphibole</i> <i>black opaque (mag?)</i></p>			<p><i>JRM</i></p>	<p><i>13/2/67</i></p>

Ms. A. 9. 2. 1. 1. 1. 1. 1. 1.

Rock Name *bucconid segnata*

Serial No. 4506 ⁴²⁸

Locality *Mag gp, Coquihalla Pass*

Field No. *ACK 66-426*

Occurrence

Megascopic

Microscopic *large shards of plagioclase, orthoclase, quartz and some of aggregate. Plagioclase exhibits alt. ± & resorption; secondary inclusions chlorite.*

MINERALS	Approx. per Cent	Cut on dotted line to make clip for section.	Analyst	Date
<i>qtz orthoclase plagioclase (-)(+) chlorite (+) sericite</i>			<i>MDM</i>	<i>13/2/67</i>
