

896712

Victoria

Nitinat Lake  
Miscellaneous

Rock Name *vein material.*

Serial No. 1898

Locality *East of Nitinat L. at Marshwood Cr. (Marshall Smith)* WDM Field No. M.S-1

Occurrence

Megascopic

Microscopic *quartz slightly biaxial, some brown ref = cordierite(?).  
Interstitial limonite, hematite and anthophyllite.*

MINERALS	Approx. per Cent.	Cut on Dotted Line to Make Clip for Section	Analyst	Date
<i>quartz hematite limonite cordierite black opague (hematite?) anthophyllite</i>			<i>WDM</i>	<i>22/5/64</i>

Rock Name *brecciated porphyry.*

Serial No. *1837*

Locality *Miyinat Lake region, Wally Deans claims. NDM*

Field No. *W.D-1*

Occurrence

Megascopic

Microscopic *feldspar phenos brecciated and partially alt<sup>d</sup> to sericite <sup>and chlorite</sup>. Fine grained matrix has brecciated texture and some indication of fine fracture planes through fabric. No polysynthetic twinning in feldspar phenos.*

MINERALS	Approx. per Cent.	Cut on Dotted Line to Make Clip for Section	Analyst	Date
<i>feldspar pyroxene (hypersthene) chlorite calcite sericite</i>			<i>NDM</i>	<i>22/5/64</i>
