WILDROSE RESOURCES LTD.

[WRS-CDNX] 10,751,351 SHS.

SPANISH MTN. ASSAYS RECEIVED - J.W. Morton, P.Geo.,

president, Wildrose

Resources Ltd., reports joint venture partner IMPERIAL METALS

CORP. [IPM-T] has released results of samples taken on 64 truck

loads of material excavated from the Spanish Mountain property near

the Village of Likely, Cariboo Mining District, 60 km east of

William Lake, central BC. The truck loads were weighed and sampled

preparatory to processing at the nearby milling facilities of the

Mount Polley Mine. As part of the current program to address grade

confidence, the material was first screened to minus 3/8-inch, being amenable to pipe and shovel sampling. The gold content of these samples, as assayed at the Bondar Clegg facilities in Vancouver, are tabled OVERLEAF P.1.

Imperial is earning into the Spanish Mountain property from Wildrose under an agreement requiring it to fund the first \$500,000 in exploration over four years. After completing this expenditure, interests in the Spanish Mountain property will be 75% Imperial and 25% Wildrose. In addition, Wildrose will receive a bonus payment of 50¢ for each ton mined. Further testing of the properties associated with the current bulk sample are proceeding. (SEE GCNL NO.168, 1Sept2000, P.4 FOR SPANISH MOUNTAIN PROJECT DATA)
