MORRISON/HEARNE HILL - J. Paul Stevenson, CEO, Pacific Booker Minerals Inc., reports assays its Morrison/ Hearne Hill porphyry copper, gold project located 65 km northeast of Smithers, northern BC. Pacific Booker holds a 100% option on the Hearne

Hill part of the project, subject to a 4% NSR, and can earn a 50% interest in the Morrison ground from Noranda Inc.

Diamond Drill Hole MO-00-10 is located 200 metres north of diamond, drill hole MO-00-09 testing the eastern edge of the intrusive. The drill hole was drilled azimuth 270°, dip 60°

Diamond Drill Hole MO-00-11 was drilled 50 metres southeast of diamond drill hole MO-00-10, azimuth east, and dip 70°. This hole was to test mineralization to the east.

Results are tabled above. (SEE GCNL NO.146, 31Jul2000, P.5 FOR PREVIOUS MORRISON/HEARNE HILL PROJECT INFORMATION)
