QUINTO MINING CORP.

[QU-CDNX] 15,517,179 SHS.

SADDLE MOUNTAIN OPERATIONS BEGIN - Tyrone Docherty, president of The Quinto Mining Corp. reports industrial mineral operations have started at its 100% owned Saddle Mountain mica, sericite, graphite property in Lumby, 20 km east of Vernon, south-central BC. Quinto has begun processing ore at its pilot plant facility located about 1.5 km from the mine site. Quinto will be able to supply volumes of material to those companies requesting them for testing purposes. If required, Quinto, will be able to begin smaller scale production in advance of the construction of a larger mill.

Quinto has recently hired a new metallurgist, John Jiang, who

has experience in the industrial minerals industry with emphasis on mica. Mr. Jiang will be working with George Hawley, technical and marketing director, to maintain the level of quality control necessary for the purchasers of the specialized industrial mineral products. (SEE GCNL NO.72, 12Apr2000, P.5 FOR PREVIOUS SADDLE MOUNTAIN PROJECT DATA & NO.79, 25Apr2000, P.9 FOR LAWSUIT RESOLUTION INFORMATION)
