AFTON DRILLING PERMITS RECEIVED - John Kruzick, presiden, reports DRC Resources
Corp. has received final confirmation from the Ministry of Mines to proceed with the $\$ 700,000$ drill program a the formerly producing Afton open pit copper, gold, silver mine near Kamloops, souch, central BC. DRC holds an option to earn a $100 \%$ interest in the project, subject to a $10 \%$ NPI. SEE CROSS SECTION OF AFTON MINE OVERLEAF P.3. To earn DRC must issue $2,000,000$ shares over six years and spend $\$ 6,500,000$ on exploration over nine years. The company plans to start the two-phase diamond drill project, as recommended by J. McDougall, P.Eng. in his November 1999 geological report as soon as possible.

The Afton deposit is unique to North American porphyry deposits as gold grades increase rather than decrease in the sulphide rock beneath the oxide cap. Drilling will test the size and grade of higher grade zones intersected in previous drill holes such as 0.1 ouncetton gold over 70 metres ( 230 feet) in DDH80-4 and $2.5 \%$ copper over 200 metres ( 660 fect) in DDH73-32.

There is excellent potential to increase the $10,500,000$ tons of $1.52 \%$ copper and $0.03 \mathrm{oz} . \mathrm{gold} /$ ton as the zone is untested and open along strike and to depth. A drill contractor has been selected and the company has funds available to carry out the 5,000 metre diamond drill program. (SEE GCNL NO.33, 17Feb2000, P. 3 FOR dDEVIOIIC AETON MINE PROIFCTINFORMATIONI
