THE QUINTO MINING CORP.

[QU-CDNX] 13,756,532 SHS.

INDUSTRIAL MINERALS UPDATE - Tyrone Docherty, president, reports results from recent research of industrial minerals from the Quinto Mining Corp.'s Lumby project near Vernon, BC has been reviewed by chairman M.B.

(Hank) McKinney while visiting Micro Grinding Systems (MGS) in Little Rock, Arkansas. Quinto holds a 100% interest in the mica, sericite, graphite property. Mr McKinney met with Bruce Winn, owner of Micro Grinding, which specializes in the grind researching fine grinding of Quinto's minerals. The conclusions:

- 1) Grinding of the mica to less than 1 micron which is the most desired industry standard, has been attained;
- 2) Proper equipment is available to pursue this new market.
- 3) Equipment will be available to purchase on short notice.

Mr. Winn has extensive experience in fine grinding, including 30 years as senior mill man and engineer for Reynolds Metals. Mr. Winn and Mr. McKinney have been associated through various corporate interests for over 15 years and through their associations, have concluded on agreements that see Micro Grinding making available to Quinto further economic opportunities within the industrial minerals sector. Quinto is also finalizing discussions with marketing specialists. (SEE GCNL NO.231, 2Dec99, P.7 FOR PREVIOUS PROJECT DATA)
