## CLAIMSTAKER RESOURCES LTD.

[CLN-V] 20,585,421 SHS.

BLACKDOME DRILL RESULTS - Richard Somerville, president,  
Claimstaker Resources Ltd.,

reports diamond drilling at the Blackdome Gold Mine near Clinton,  
southwest BC has completed seven holes for a total of 3,479 feet of  
drilling. The project is a 50/50 joint venture between Claimstaker  
and Jipangu Inc. of Tokyo

The program targeted the No.11 vein in an effort to discover  
new ore reserves below and to the north of existing workings. All  
seven of the holes intersected the No.11 vein and encountered  
significant gold values. Holes UG No.95 and UG No. 96 intersected  
what appears to be a new lens of ore on the No. 11 vine. The results  
are as follows:

HOLE NO.	WIDTH METRES	GOLD GR/T	GOLD OZ/T	SILVER GR/T	SILVER OZ/T
UG NO.95	0.70	34.0	1.0	26.1	0.76
VISIBLE GOLD WAS OBSERVED IN HOLE US NO. 95					
UG NO.96	0.30	301.2	8.8	82.1	2.4

The drilling program is temporarily suspended until a larger  
drill is delivered to the property and new drill stations are prepared.
