KAMAD SILVER CO. LTD. (KDS-V)

DEAL STRUCK ON - Jack M. Maris, president of Kamad B.C. GOLD CLAIMS Silver Co. Ltd., reports they signed an agreement on 15May87 with KERR ADDISON MINES LTD. (KER-T) and Texaco Canada Resources Ltd. on Kamad's Windpass gold property, 15 miles east of Little Fort, 50 miles NNE of Kamloops, B.C. The property was mined from 1916 until 1944 during which time 80,000 tons were removed yielding 34,453 ounces of gold for an average of 0.43 oz.gold/ton.

The agreement calls for Kerr to pay Kamad \$70,000 in cash and spend \$1,200,000 in work by Oct.31/90 to earn 60% interest in the Windpass property. Texaco will receive \$1,000,000 in royalties out of production.

Kamad will retain 40% interest.

Kerr Addison has a geological survey crew on the property now and expects to drill shortly.

Kamad has 9,981,973 shares outstanding.

ANDAUREX RESOURCES INC. (AMX-V) reports that Noranda Exploration Company will commence exploration on the company's gold property near Silverton, B.C. in early June. Detailed drilling will be performed on the large breccia zone where widespread gold values of ore grade were encountered in exploratory drilling last season. In addition, drilling will be carried out on a new zone lying to the north which was identified last year. Gold values were obtained over a wide area by geochemical surveys and rock sampling. On the adjoining Willsa property Northair Mines is approaching a production decision.

**TURNER ENERGY & RESOURCES LTD.** (TUN-V) pursuant to a 17Jan86 agreement between Turner & SMR Technologies Ltd. of Richmond, B.C., will buy the Redcliff 1 & 2, Gertrude 1 & 2, Abott, and SOB claims (110 units in aggregate) in the Trout Lake area, B.C., for \$30,000 & 200,000 treasury shs. (50,000 shs. now & the balance staged over the development of the property). The purchase is subject to a 3% net royalty interest payable to SMR & a 2% net profit interest reserved for Ram Exploration Ltd. of Vancouver, B.C.

**REA GOLD CORPORATION** (REO-V,T;REOGF-Nasdaq)

DRILLING IS PROVING UP A HIGH - Larry M. Reaugh, president of Rea Gold Corporation, reports additional results GRADE CORE AT ADAMS LAKE, B.C. received from Minnova, Inc. (formerly Corporation Falconbridge Copper) from their continuing successful drilling program on the high grade silver zone on Rea's property at Adams Lake, B.C.

These results confirm and extend the spectacular values in Trenches 3,4 and 5 and in Holes 71, 89 and 90 previously reported as follows:

71	104.25-108.45	4.20 (13'- 9")	28.80	0.037	5.03	3.72	1.07	39.96

T4	Surface	0.85 ( 2'-10")	255.25	.324	1.37	24.98	4.22	297.81
T5	Surface	4.80 (15'- 9")	79.75	.048	0.82	8.65	1.75	91.78

Mr. Reaugh says all the holes and trenches referred to in this release are contained within an open area 100 meters wide by 150 meters long. The average thickness of mineralization has been calculated to be 3.56 meters all of which is within a depth not exceeding 120 meters at the deepest point. Thus, the overall significance of these data is that this portion of the high grade Silver Zone contains metal values which exceed \$750,000 Cdn. per ton.

Mr. Reaugh also notes that in all likelihood these reserves could be mined from an open pit. This high grade section is contained in a zone of mineralization estimated by Rea Gold to contain more than 1,100,000 tons. The project is a joint venture between Minnova 70% and Rea Gold 30%. Rea Gold recently acquired from A.J. Hilton a 5% net smelter return royalty.

Drilling continues on this high grade Silver Zone which still remains open in both directions along strike.

WESTRON VENTURE LTD president Michael Berg reports the start of trenching and reverse circulation drilling on their Sivanah property, northeast of Princeton, B.C.

TILLICHIM GOLD MINES LTD. (TLC-V) has been renamed TILLICHIM INDUSTRIES LTD. (TLC-V) with no consolidation of capital or change of symbol.
