

**TURNER ENERGY & RESOURCES LTD. (TUN-V)** pursuant to a 17Jan86 agreement between Turner & SMR Technologies Ltd. of Richmond, B.C., will buy the Redcliff 1 & 2, Gertrude 1 & 2, Abott, and SOB claims (110 units in aggregate) in the Trout Lake area, B.C., for \$30,000 & 200,000 treasury shs. (50,000 shs. now & the balance staged over the development of the property). The purchase is subject to a 3% net royalty interest payable to SMR & a 2% net profit interest reserved for Ram Exploration Ltd. of Vancouver, B.C.

NO.102(1987)  
MAY 28, 1987

**REA GOLD CORPORATION (REO-V,T;REOGF-Nasdaq)**

DRILLING IS PROVING UP A HIGH - Larry M. Reaugh, president of Rea Gold Corporation, reports additional results GRADE CORE AT ADAMS LAKE, B.C. received from Minnova, Inc. (formerly Corporation Falconbridge Copper) from their continuing successful drilling program on the high grade silver zone on Rea's property at Adams Lake, B.C.

HOLE (RG#)	INTERVAL METERS	TRUE WIDTH METERS FEET	SILVER OZ/TON	GOLD OZ/TON	ZINC %	LEAD %	COPPER %	TOTAL SILVER EQUIVALENT OZ/TON
89	48.15- 59.8	11.65 (33'- 2")	41.63	0.065	2.85	1.33	1.10	50.67 OZ/TON
	*48.15- 52.15	4.00 (13'- 2")	102.00	.140	4.89	2.26	2.70	
90	98.37-102.11	3.74 (12'- 3")	56.27	.090	2.64	1.13	1.71	67.36
	*99.10-102.11	3.01 ( 9'-11")	68.70	.106	2.60	0.93	2.10	
93 **	113.80-114.45	0.50 ( 1'- 8")	4.55	.016	1.09	0.87	0.85	8.47
	114.90-115.2	0.25 ( -10")	3.50	.022	3.41	1.76	0.80	10.64
95 **	129.00-130.00	1.00 ( 3'- 3")	10.03	.012	3.03	1.80	1.60	17.48
96 **	13.80- 15.20	1.40 ( 4'-7")	43.49	.041	1.71	0.01	1.74	50.29
97	16.97- 21.17	3.95 (13'-0")	34.77	.036	25.50	0.83	4.61	69.77
98	42.80- 48.20	5.40 (17'-8")	79.92	.144	1.96	1.65	2.63	95.20
99	71.00- 77.80	6.70 (22'-4")	36.87	.062	3.46	2.23	1.73	47.98

\* Previously announced intercepts

\*\* Located on outer fringes of mineralized zone

These results confirm and extend the spectacular values in Trenches 3,4 and 5 and in Holes 71, 89 and 90 previously reported as follows:

71	104.25-108.45	4.20 (13'- 9")	28.80	0.037	5.03	3.72	1.07	39.96
T3	Surface	3.10 (10'- 2")	83.28	.130	3.30	17.80	1.84	108.40
T4	Surface	0.85 ( 2'-10")	255.25	.324	1.37	24.98	4.22	297.81
T5	Surface	4.80 (15'- 9")	79.75	.048	0.82	8.65	1.75	91.78

Mr. Reaugh says all the holes and trenches referred to in this release are contained within an open area 100 meters wide by 150 meters long. The average thickness of mineralization has been calculated to be 3.56 meters all of which is within a depth not exceeding 120 meters at the deepest point. Thus, the overall significance of these data is that this portion of the high grade Silver Zone contains metal values which exceed \$750,000 Cdn. per ton.

Mr. Reaugh also notes that in all likelihood these reserves could be mined from an open pit. This high grade section is contained in a zone of mineralization estimated by Rea Gold to contain more than 1,100,000 tons. The project is a joint venture between Minnova 70% and Rea Gold 30%. Rea Gold recently acquired from A.J. Hilton a 5% net smelter return royalty.

Drilling continues on this high grade Silver Zone which still remains open in both directions along strike.

**WESTRON VENTURE LTD** president Michael Gerg reports the start of trenching and reverse circulation drilling on their Sixash property, northeast of Princeton, B.C.

**TILLICHU GOLD MINES LTD. (TLC-V)** has been renamed **TILLICHU INDUSTRIES LTD. (TLC-V)** with no consolidation of capital or change of symbol.
