

SKYLINE EXPLORATIONS LTD. (SKX-V)

MILL CONTRACT IS AWARDED - R.E. Davis, president, says
SPECTACULAR ASSAYS AWARDED Skyline Explorations Ltd.

has awarded a contract for mill construction on its 100%-owned Stonehouse gold deposit 60 miles north of Stewart in NW B.C. to Orocan Inc. of North Vancouver. The mill's initial capacity will be 200 tons per day but can be easily upgraded to 400 tons per day at a nominal cost.

Skyline is receiving excellent co-operation from both provincial and federal government agencies on its Stage I report which requires approval in principle before field construction can start. Mr. Davis expects this approval in late June, at which time Skyline will have confirmed threshold tonnage and grade targets. He expects construction will start on 1July87.

The occurrence of an extremely high grade gold zone in the 16 Drift, encountered in a new raise, has returned some spectacular assays; these are presently being compiled and will be released early next week.

TRAFALGAR RESOURCES INC. (TFR-V)

NAME CHANGE - Trafalgar Resources Inc. has received regulatory approval to change its name to

PROVEN RESOURCES LTD. has been renamed SHAYNA INTERNAT.
