88-204	5.1	.194	1.92

MT. WASHINGTON - Dennis C. Baxter, a director of Better
DRILL RESULTS Resources Ltd., reports that diamond
 drilling is continuing at the south end
 of the Lakeview zone on Mt. Washington, 15 miles west of
Courtney, Vancouver Island, B.C.

Two trenches, designated 88T1 and 88T2, were
 blasted at the north end of the main drilled area where
 previous drill results were low grade. Five channel
 samples in trench 88T1 averaged 0.101 oz.gold/ton and
 0.25 oz.silver/t over 7.5 feet, and six channel samples
 in trench 88T2 averaged 0.283 oz.gold/t and 1.12 oz.
 silver/t over 6.9 feet. A high grade band was present
 in each trench with individual samples ranging from 1.8
 ft. of 0.209 oz.gold/t to 2.5 ft. of 0.306 oz.gold/t in
 trench 88T1, and ranging from 1.6 ft. of 0.187 oz.gold/t
 to 2.6 ft. of 2.10 oz.gold/t in trench 88T2.

Noranda has completed 3 holes on its Murex option,
 located 1.5 miles southeast of the Lakeview zone, in
 which Noranda can earn a 51% interest. (SEE GCNL
 No.177, p.2, 14SEP88 for previous drill results).

KAPPA RESOURCE CORPORATION (KPC-V)

<u>HOLE</u>	<u>INTERVAL, FT.</u>	<u>LENGTH</u>	<u>OZ. GOLD/T</u>	<u>CASTLE CLAIM</u>
CAS 88-7	84.8-109.12	24.9 ft	.130	'RESULTS REPORTED
Including		3.8	.319	' Frank Evanshen,
		6.7	.240	'a director of
CAS 88-8	54.0- 75.8	21.9	.083	'Kappa Resource
	135.0-156.1	21.6	.050	'Corporation,
Including		5.1	.270	'reports that 9
		5.7	.141	'holes of an 11
CAS 88-9	222.4-270.7	49.0	.021	'hole, 3,808 foot
	405.4-461.4	57.0	.022	'drilling program

 'have been complet-
 ed on the Castle claims, located in the Iskut-Stikine
area of northwestern B.C., some 10 km west of Iskut, 55
km east of Telegraph Creek. Kappa can earn a 45%
 interest by spending \$1,000,000 in stages by 31Dec92.
 Teck Corporation 45% and Consolidated Silver Standard
 Mines Limited 10% are joint venture partners. The
 mineralization encountered in holes 7 to 9 tested a
 strike length of 800 ft. within a larger zone 1.4 miles
 long averaging 400 ft. in width.

GOLDSRING RESOURCES LTD. (GSJ-V)

FOLLOW UP DRILLING PLANNED - Goldspring Resources Ltd.
 has reported that diamond

drilling on the 100% owned Foghorn Mountain property was
 planned to start 25Sept88. The program consists of 14
 drill holes totalling 5,000 feet to further define
 strata-bound lead-zinc-silver mineralization that was
 partially defined by drilling in 1984. The two 1984
 drill holes spaced 650 feet apart returned significant
 lead-zinc-silver values. The northern hole returned
 values grading 3.34% lead + zinc and 2.7 oz.silver/ton.
 Assay results from the drilling will be released as
 received. #27029
