89-113	166.3-168.0	1.7	.238	' sident C.von
	238.2-239.5	1.3	.275	' Hessert, has
89.118	156.7-158.0	1.3	.439	' reported ass-
	189.0-192.1	3.1	.108	' ays from 3 new

holes on the LeRoi property at Rossland, B.C. These holes were drilled as follow up to the intersection in hole No.89-87 of 8.4 feet of 7.1 oz.gold/t. The relative locations of the holes has not been reported. Additional surface and down-hole geophysical surveys are underway. Preliminary results suggest the presence of several additional sulphide targets.

The company has negotiated a private placement of flow through shares to provide \$375,000 from NIM Resources - 1989, subject to closing about Oct.24,1989, at a price yet to be fixed.
