MCNELLEN RESOURCES INC. (MNR-V)

MCNELLEN TO DRILL - J.T.Flanagan, president of McNellen  
BASE METAL PROPERTY Resources Inc. reports that a 5000  
foot diamond drilling contract for  
its copper/silver/gold property on at 6,500 feet  
elevation on Mount Foley, 15 miles south of Chilliwack,  
B.C. has been awarded to F. Boisvenue Diamond Drilling.  
Drilling is expected to start before month end. The  
target of this program is a large skarn type copper  
deposit which has been traced in previous work for a  
length of 500 feet and widths of up to 250 feet. Chip  
sampling of this area on 30 foot centres in 1988  
returned an average of 1.6% copper with individual  
samples assaying from 0.02% to 24.87% copper. The  
deposit is open at both ends and at depth and has  
potential for large tonnages amenable to bulk mining.
