TANTALUS RESOURCES LTD. (TTU-V)  
TEUTON RESOURCES LTD. (TTO-V)

FIELD CREWS MOBILIZED - Neil Dragovan, director reports Tantalus Resources Ltd. has mobilized field crews to the Treaty Creek project 50 miles NNW of Stewart, D.C. and 11 miles east of the Eskay Creek project of Calpine/Cons.Stikine. Tantalus can earn a 51% interest in the property from Teuton Resources Ltd. by making cash payments totalling \$300,000 and spending \$3,200,000 on exploration over 5 years, and issuing

200,000 shares over 3 years. (SEE also Teuton p.3, this issue). Tantalus has initiated detailed mapping and sampling of the Konkin zone in preparation for diamond drilling in late August, and prospecting on other parts of the property. An airborne survey in early 1989 indicated the volcanic stratigraphy hosting the 21 zone, Eskay Creek project, can be traced to Treaty Creek. Hole 87-2, drilled directly under the Konkin pit averaged 0.654 oz. gold/t over 7.6 ft. Trenching by Teuton in 1988 expanded the known extent of the Konkin mineralization and returned 0.061 to 0.401 oz.gold/t over 6.6 to 55.8 feet.
