WESTERN CANADIA

BRENNA RESOURCES LTD. (BRW-V)

SAMPLING RESULTS - Dan Geronazzo, director, reports  
Brenna Resources Ltd. has completed a  
sampling program on the Twin Lakes property, near  
Keremeos, Okanagan, B.C. Forty 10-pound samples were  
taken from an old tailings dump from a previous  
operation on the property that returned an average grade  
of 0.13 oz.gold/ton. Brenna is considering fine  
grinding the tailings recovering the gold via froth  
flotation. The 400 ton/day Dankoe mill is nearby.

An application has been made to the Minister of  
Mines for a permit to process the tailings. The claims  
will be surveyed to clarify boundaries.
