**PACIFIC TALC LTD. (PTL-V)**

PILOT TEST PROGRAM - Courtney Parmentier, president, reports Pacific Talc Ltd. will completed its 50-tonne pilot testing program by the end of January/90. Delays were encountered due to testing column flotation cells rather than conventional flotation methods. This improvement will reduce plant size and cost. A feasibility report by Minproc is expected by year end. Pacific Talc's property near Boston Bar, B.C. has 1,000,000 tons proven and 6 - 9,000,000 tons probable and inferred reserves.
