NO. 232(1989)  
DECEMBER 4, 1989

WESTERN CANADIA

BLUE EMERALD RESOURCES INC. (BER-V)

Mr. Nemis also reports mapping, sampling, prospecting and a trenching program have been carried out on the Mount Graves property in the Toadogone area of north-central B.C. where the company has an option to purchase 100%. The best assay from a grab sample returned 0.18 oz.gold/t, 30 oz.silver/t, 2.3% lead and 2.8% zinc. A chip sample over 3.3 feet assayed 0.03 oz.gold/t, 14.6 oz.silver/t, 1166 parts per million lead and 736 ppm zinc. A trenching and diamond drilling program has been recommended. As much of the property is as yet unexplored, Blue Emerald plans to expand the exploration work to include these areas.
