SKYLINE GOLD CONCENTRATION (SKL-10)				GOLD OZ/T	MORE REG ASSAYS M.F. Price, presi- dent reports Skyline Gold Corp. has rec- eived further assays from its drill pro- gram on its 100% owned Reg property located 100 km north of Stewart, B.C., where drilling has concentrated in the Bronson Creek area in the northern por- tion of the claim. (SEE REG. Nos. 231 & 187 FOR EARLIER III- FORMATION) See map overleaf page 1. The program is testing the existence of a new multiple vein system extending NW that appears to coincide with the strike of the Twin zone of the SNIP deposit to the north. Skyline plans extensive drilling is planned for 1990.
